10. What are the new quality point weights and who do they affect?  
The new quality point weights only affect first time ninth graders in the fall of 2015-2016 and all students entering high school after that year. This change does NOT affect students who will be in grades 10, 11, or 12 or freshmen who were retained in 2015-2016. **The new quality point weights will provide incoming freshmen with an additional .5 quality point to Honors courses and 1.0 quality point to Advanced Placement (AP)/International Baccalaureate (IB) courses, community college courses, or four-year university or college courses taken in high school.** For example, a rising freshman who earns an A in an AP course would receive a weighted 5.0 grade for that particular course. A rising freshman who earns an A in an Honors course would receive a weighted 4.5 grade.
